DESIGN GUIDE

Thank you for your interest in our ProSphere custom Dye Sublimated uniforms. This email explains the process used to order ProSphere uniforms from ACD Sports.

1. Click on the Teamwork ProSphere logo in the center of our web page or at the bottom of this email this will open the ProSphere Designer in a new window.
2. First select your sport and either the male or female button under the picture. From there a window will pop up asking for either express or blank mode. For the most options select blank mode.
3. Now select the cut and design for your uniforms. Don't worry if you aren't sure which you like the best you will always have the option to go back and change later. Click on customize selection at the bottom of the window to proceed.
4. Now is the time to select your uniform colors. Have custom colors or want to match a logo color? Contact us and we can create custom colors for you no additional charge. Generally you will have three choices for ProSphere uniforms. As you select colors they will appear on the model shown next to the selection box.
5. Now select the "Fabrics" tab at the top of the selection window. Most types of uniforms have multiple choices of fabrics and the descriptions are show with each style. Choose the fabric that suits your needs and budget. You will see the manufactures pricing on the right side. Your ACD Sports rep will make sure you get the best discounts available for you.
6. The next step is to start adding team names, player names, logos, numbers, and any other graphics you desire. Remember that there is no additional charge for graphics so add as many as you like. You can also upload your own logo at this point in the process. Note that player names are not available on racerback style jerseys due to size limitations. Don't forget you can add graphics to the short and pants as well as the shoulders of the jerseys.
7. Once you are satisfied with the design we suggest you save your design. You will be given a retrieval code which will allow you to recall your design if you want to make any changes. Next click on continue to final steps and the designer will exit to a spread sheet which allows you to enter the individual players sizes, names and numbers.
8. At this point email the retrieval code to info@acdsports.com and we will review your order and the email our best price quote. Once the order is placed the art department at ACD and Teamwork will review the design and make any suggestions to improve the overall look of the uniform. Once the final design is agreed upon you will be sent a proof of the design for your approval.

Standard manufacturing time is 14 business days but can be expedited to 7 business days with an additional charge. Shipping time depends on your location. All uniforms are shipped directly to you from San Marcos , CA .
